Subject RE: EE/CA preliminary ARARs

History:

This message has been replied to.

Chris - I'm not sure if you are aware of this, but we submitted an ARAR Identification document to EPA on November 8, 1999. In a letter back to OPOG on December 30, 1999, EPA stated that our "Draft ARARs Document is approved with comment." (note that one of the comments was that DTSC had not yet provided comments, at that time).

Our proposed approach, therefore, is as follows:

- the 11/8/99 document will be the basis for the EE/CA ARAR section.
- the EE/CA ARAR discussion will also (1) address EPA's 12/30/99 comments, to the extent they are still applicable, and (2) address/incorporate the DTSC comments attached to your e-mail.

Please let us know if you have any concerns with this approach.

Dave

Subject: EE/CA preliminary ARARs

Chuck and Dave,

DTSC provided the attached preliminary ARARs for the EE/CA. They should be considered draft and likely include some requirements that will drop out. Additional ARARs may also be added through review of the draft EE/CA, but hopefully this will be a good start.

Chris
